

REBECCA MARY BURON SØRENSEN

1 semester student, studying Computer science (Full stack developer) at Cphbusiness Lyngby. At this study is Programing, System Developing, and Project leading, to be touch throughout the following 4 semesters. This CV is a small intro to what I have learned so fare.

WHY PROGRAMING?

The solution-oriented mind set matches with how I like to think, and I like to solve a problem that has numerous solutions.

JAVA CODING DESIGNES

Buildings and Rooms

This task is an exercise in accessing fields in objects within objects. Create a building with some rooms and find the total amount of lamps in the rooms.

ChillFlix

In the project, me and my group have developed a software system as a streaming services such as Netflix or HBO. In the system there are media that can be played, movies or series. Both are divided into categories and series also consist of seasons and episodes. This is purely text-based. Some of the problems we had, was the path to the txt files. To make sure it run, make a new copy of the path to the txt file.
